

The EyeC Optometry E-Commerce store specializes in selling high-quality eyewear options with a personalized shopping experience. The store will feature a wide range of products from the world's leading eyewear brands and a variety of affordable options for budget-conscious consumers.

Having an experienced optometrist like Dr. Dean Le leading the business is definitely a plus, as customers can trust that the products sold on the website will be of good quality and meet their vision needs. Our E-Commerce store offers a wide range of products from top eyewear brands and a variety of affordable options for budget-conscious consumers.

The virtual try-on and home try-on options are great features to have, as customers can try on different styles and find what suits them best without having to physically visit a store. The styling advice and personal prescription management will also be helpful for customers who are not familiar with choosing eyewear or need help with their prescriptions.

Our E-Commerce store also provides the option for pickup at our physical locations in Gilroy, Camden, and Vietnam Town to cater to customers who prefer to shop online but also want the convenience of picking up their purchases in person.
